

FOR IMMEDIATE RELEASE

AWARD OF SUB-CONTRACT BY CAMPO SDN BHD

January 31, 2005, Kuala Lumpur – Campo Sdn Bhd, has as on 28th January 2005, appointed WCT Construction Sdn Bhd, a wholly-owned subsidiary of Engineering Berhad, as sub-constructor for the main civil works for a dam on the North tributary of Sungai Milau in Kudat. The contract valued at Ringgit Malaysia One Hundred And Nine Million Three Hundred Ninety Two Thousand Seven Hundred And Forty and Sen Fifty Six (RM109,392,740.56), is for a duration of thirty (30) months.

The scope of works includes construction of a dam, water treatment plants (55mld) including associated facilities, staff quarters for the treatment plants, balancing tanks and services reservoirs and booster pumps if necessary.

The contract is expected to contribute positively to the group's earnings for the financial year ending 2005 to 2007.

This contract, we believe would further strengthen WCT Engineering Berhad's foray into dam construction. After completing a dam in Bintulu in 2003, WCT Engineering Berhad again demonstrated its capability and expertise when it successfully secured a RM381.6m sub-contract works for the construction of Package 1A and 1B of the Bakun Hydroelectric Dam in Sarawak for Balui Hydro Sdn Bhd (formerly known as MCH JV Holdings Sdn Bhd) in 2004.
